

Prevent Downtime and Breaches by Securing Your Modern Apps and APIs

How your business can harness the agility and performance of NGINX App Protect and create harmony between DevOps and SecOps teams

THE APPLICATION LANDSCAPE IS CHANGING...

...AND THE THREAT LEVEL IS RISING.

30,000

websites are hacked per day²

64%

of companies have suffered at least one form of cyberattack²

\$3,920,000

is the average cost of a data breach²

20%

WITH OVER **20%** OF DATA BREACHES OCCURRING DUE TO CODE ERRORS³...

...AND OVER **40%** OF THOSE ATTACKS TARGETING WEB APPLICATIONS³

40%

It's a battle of...

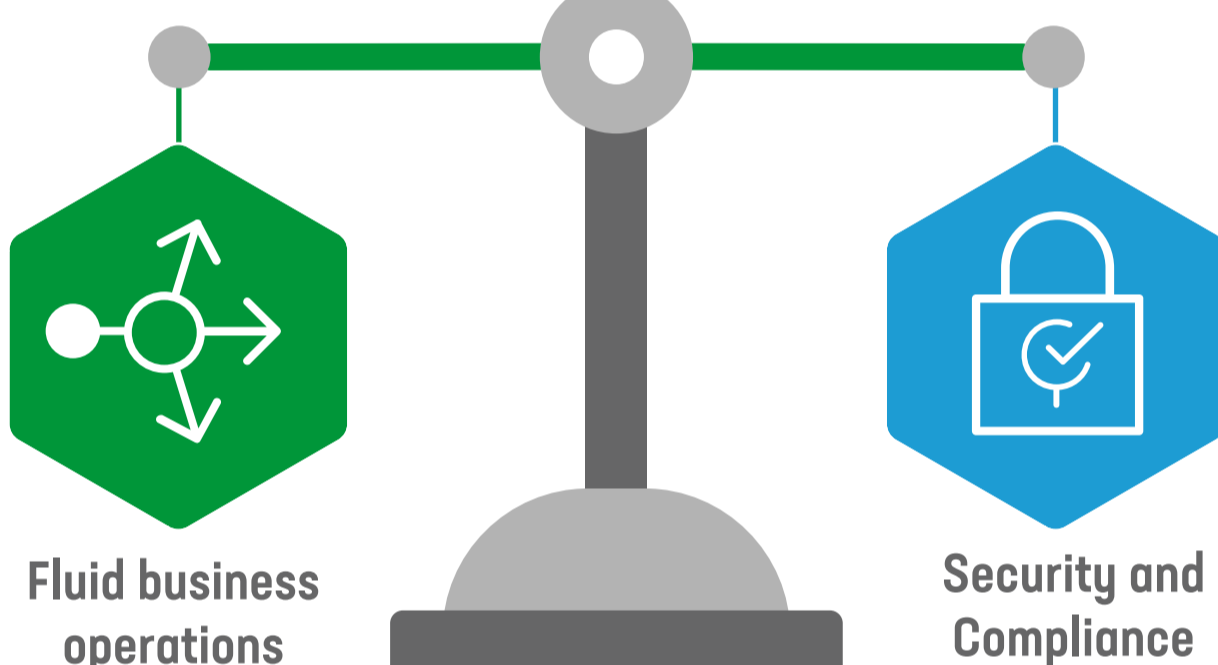

SPEED TO MARKET VS. APPLICATION SECURITY

In the DevOps corner
"SecOps doesn't understand our apps, they just slow us down."

In the SecOps corner
"DevOps isn't implementing the security controls we need."

So, how do you put an end to this friction?

CREATING A BALANCE BETWEEN

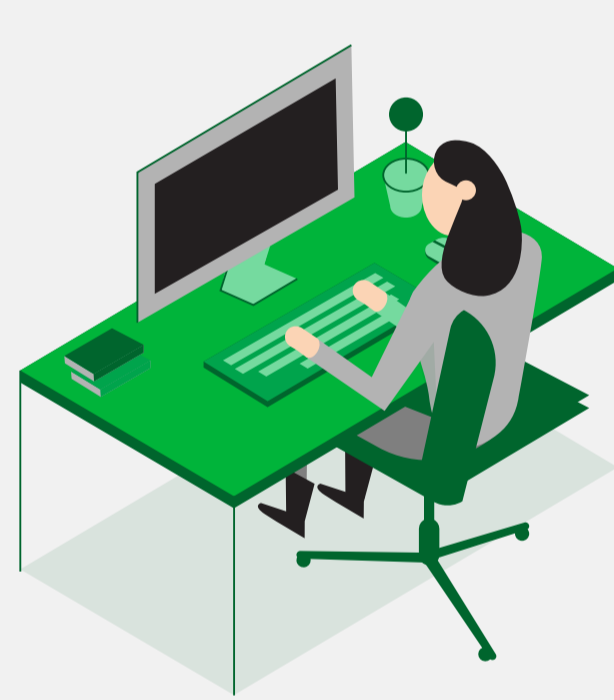

FOR DISTRIBUTED MODERN APP ENVIRONMENTS

THE ANSWER IS

NGINX App Protect

A lightweight application security solution built for modern apps.

The efficiency of F5 Advanced Web Application Firewall (Advanced WAF)

The agility and performance of NGINX

NGINX App Protect runs natively on NGINX Plus to provide consistent security controls for

Web applications

Microservices

Containers

APIs

through central management and automation.

SPEEDING UP DEPLOYMENT WHILE DELIVERING HIGH PERFORMANCE, SCALABLE SECURITY INCLUDING:

Web applications

Anti-bot mobile SDK

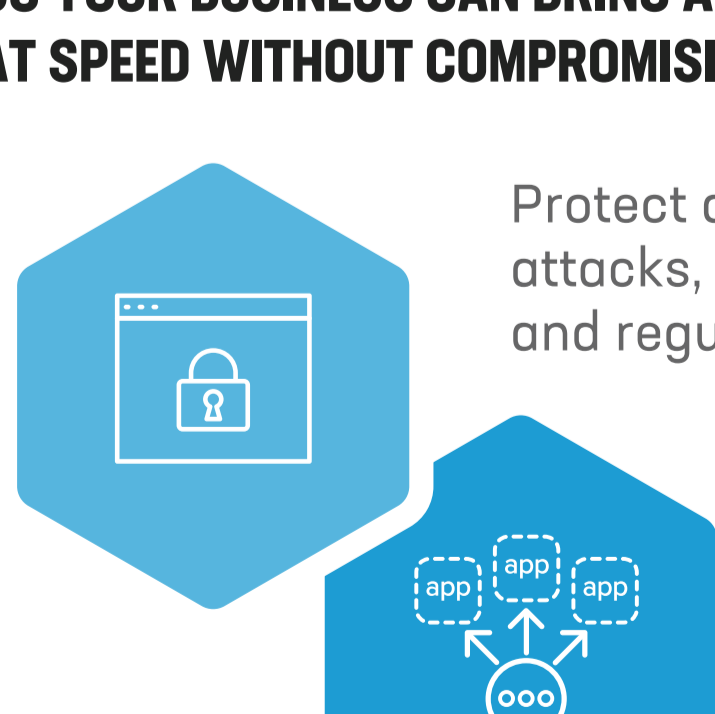

Client and server monitoring

Low false positives

SO YOUR BUSINESS CAN BRING APPLICATIONS TO MARKET AT SPEED WITHOUT COMPROMISING SECURITY...

Protect against revenue-impacting attacks, data theft, reputational damage and regulatory non-compliance.

Remove workflow bottlenecks and support "shift left" Dev initiatives.

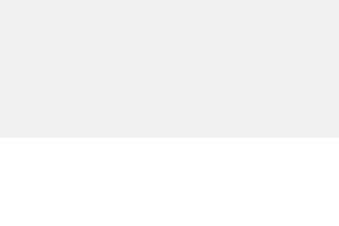

...AND DevOps AND SecOps TEAMS CAN WORK IN HARMONY.

DISCOVER HOW NGINX APP PROTECT CAN DELIVER 'BUILD ONCE, ADHERE EVERYWHERE' SIMPLICITY FOR YOUR SECURITY POLICIES AND HELP BRING YOUR APPS TO MARKET FASTER.
