

# Secure Access Service Edge (SASE)

Unified, secure and reliable access to applications, anywhere, from any device

citrix

## Your business operates differently today – new requirements, new challenges

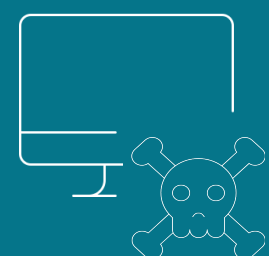

### Apps are in the cloud

Backhauling SaaS traffic to the data center for security adds latency and inefficiency

### Workers are mobile

Workers need to be secure everywhere, VPNs lack granular security and scale

### Threats are evolving

Need for security updates leaves businesses vulnerable to zero-day threats

## Legacy, hardware based networking and security architectures fail to meet today's business needs

## But neither do point solutions...

### Cloud Security

relies on Internet performance to keep your employees productive

### Zero-trust Access

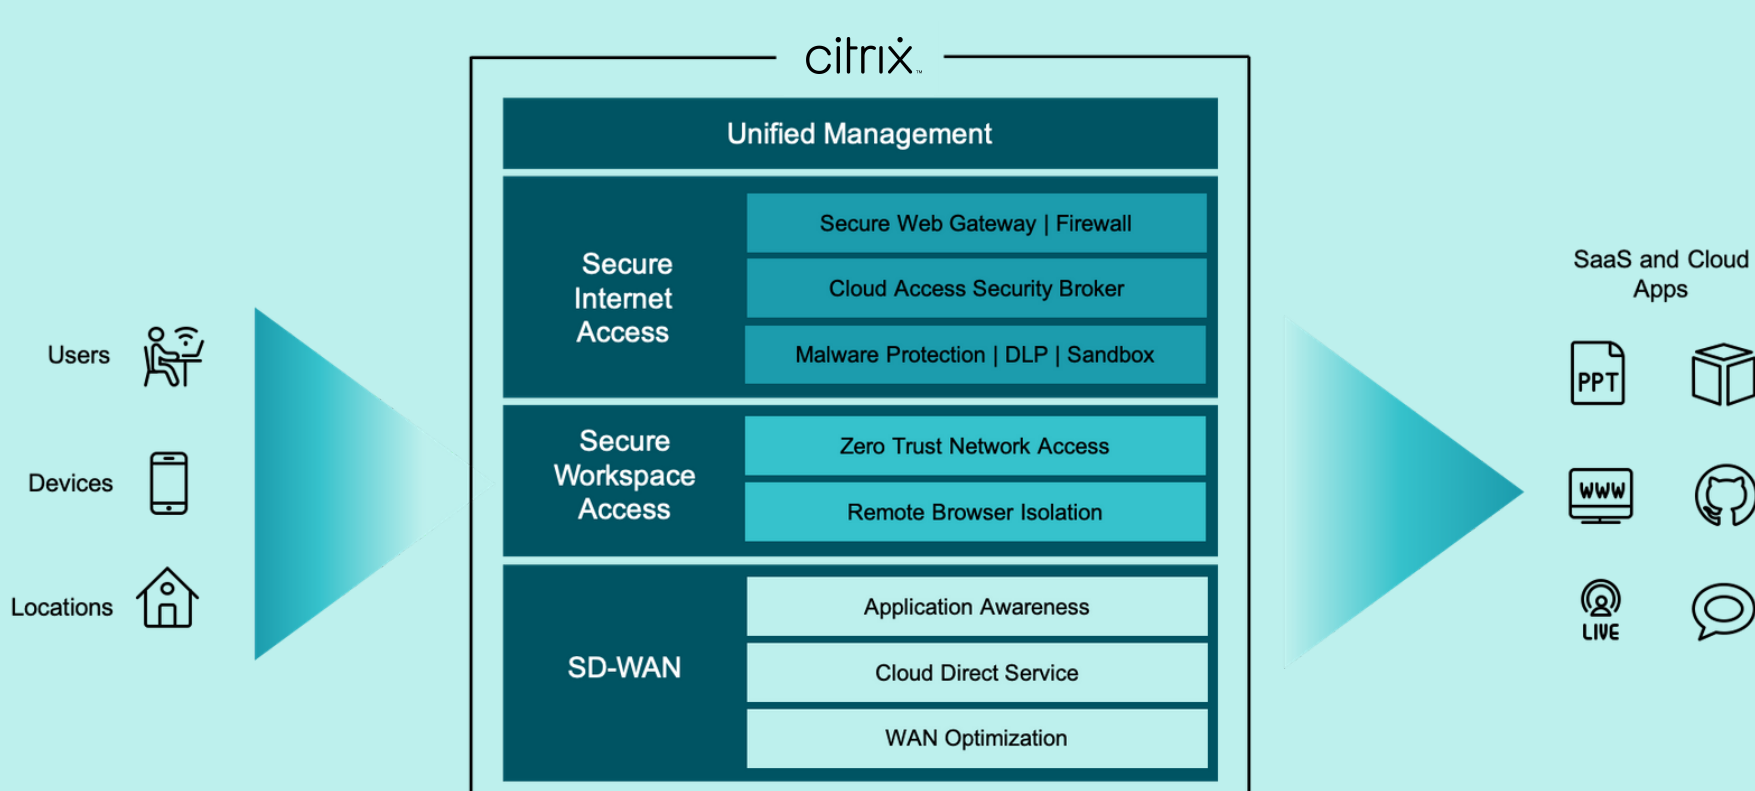

replaces VPNs but does not secure your teams against web-based threats

### SD-WAN

service chained with security adds latency and complexity

## Only Citrix offers a complete SASE solution

### ✓ Unified Management

Industry's first fully integrated networking and security solution for simple, agile, efficient operations

### ✓ Comprehensive, Cloud-delivered Security

Citrix Secure Internet Access protects all users at any location against all threats, at scale

### ✓ Deep Forensics and Easy Search

Locates specific security incidents, atypical activity and policy violations for incidence analysis and regulatory compliance

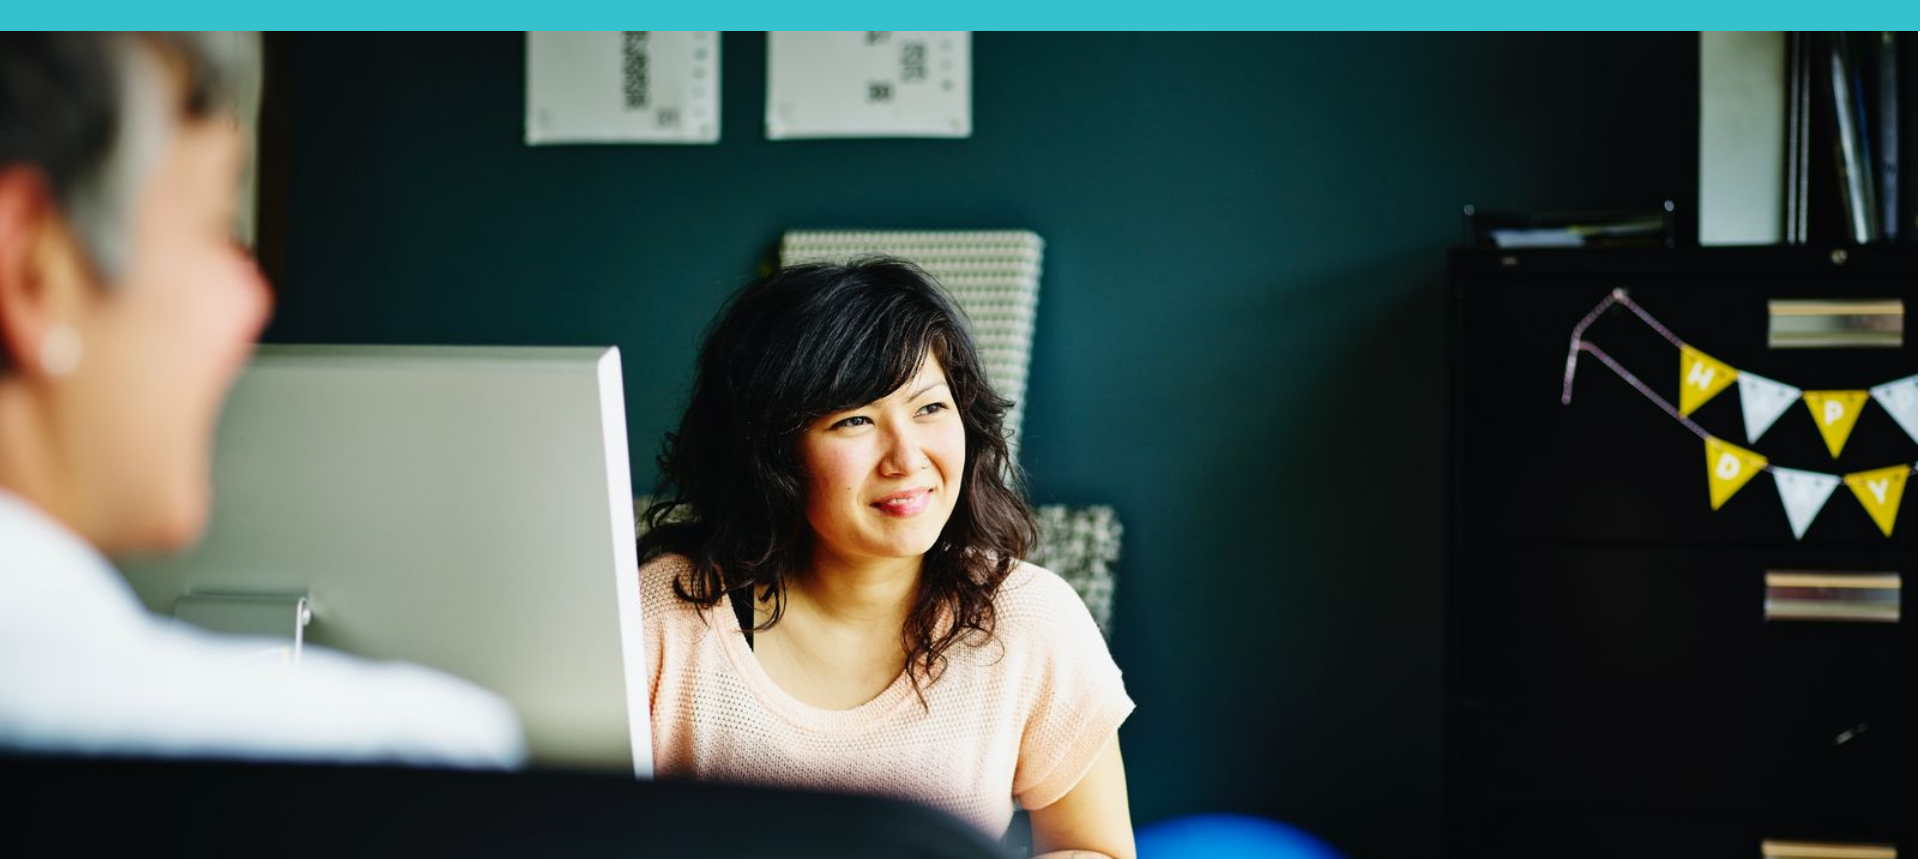

### ✓ Identity-Aware, Zero-trust

Citrix Secure Workspace Access offers continuous, identity- and risk-aware, dynamic application access that minimizes the enterprise attack surface

### ✓ Best Application Experience. Always.

Citrix SD-WAN ranked #1 by Gartner for Application Experience Optimization\*
